Skills

Websites PHP (5.4+) with MySQL, Javascript and CSS; Symfony 2.5+, Codeigniter 3+, Laravel 5.3, Angular 1.5.x
Other C++, Swift (iOS), Wordpress

Projects

Mum I'm Here Personal project for mapping your present and past trips. PHP + MySQL + Javascript (pure & jQuery, bootstrap), with Google Maps API for maps, automatic emails and notifications.
<http://MumImHere.info>

- Geonaut** Personal project, one selfie a week. Very sharp design and clever backend. PHP + MySQL + Javascript (jQuery & bootstrap), with Flow.js (chunk uploader), ColorThief.php (average color used, PHP library) and Google Maps API. <http://Geonaut.uk>
- Mamasú Agency** Development from scratch of a marketplace for ISPs, with payment process, recommendations, FAQ database. The backend provisioned the user with their new services (e.g. 10 GB extra of web storage) through the use of several private APIs.
- Mamasú Agency** Development from scratch of an API to connect an iOS app (Jungle Prize) with our servers, using double encryption and user authentication.
- Oymo** Freelance project for residue-management company (Oymo S.L., Spain) with a custom-made CMS for content management in many languages. <http://oymo.es/beta>
- PHP Framework** Custom-made modular MVC PHP framework with Routing, Authentication, Hooks and Asset Minification (.min.*). All the projects on this list (except the ones from Mamasú Agency) are made using this framework. The code is not available on the internet.
- Valideight.js** jQuery plugin for live form validation, with easy implementation with Bootstrap and back-end (PHP) validation as well. The code is not available on the internet, but you can see it working at <http://mumimhere.info/login?action=signup>
- PureParallax.js** Responsive parallax effect using pure Javascript, in 653B (< 1KB). See it at <http://kupfer.es/pure-parallax/index.php>
- YouTubeGo** Integration of YouTube API into a one-page webapp with search capabilities, playlists and I'm feeling lucky. <http://youtube.kupfer.es/>
- Kupfer.es** Personal website with other things I've done <http://kupfer.es/>
- Furniture Hire UK** Building e-commerce platforms powered by Laravel5 and Angular 1.5.x
